A. E. WOHLERT'S NURSERIES

PENN VALLEY, NARBERTH
PENNSYLVANIA

1940 Price List

PLEASE READ CAREFULLY

Conditions of Sale

This price list supercedes all previous lists. We offer unusual trees, shrubs and evergreens. While we carry a complete line of nursery stock, we list only items that are unusual and can be packed and shipped with perfect safety.

These prices do not cover stock specially selected by the customers at the nursery, which will be charged according to its value regardless of size. Also specially selected material to conform to the customer's particular specifications would rate an additional charge.

All our stock is guaranteed true to name and up to the grade and quality ordered, and after leaving our nurseries in good condition our responsibility ends. If you are not prepared to plant the trees on arrival, moisten the bundle with a hose. Prepare the holes, then unpack and plant. **Do not open up the bundle until the holes are ready for planting.**

All material is freshly dug, and we can generally ship all winter, from early November until May. At certain intervals during January and February we may occasionally be frozen up for a week or two.

No charge for packing except on Weeping Cherries, and heavy specimen trees over 8 feet that have to be packed in a box or crate, or that would cost considerably more than the average packing. Freight and express charges are to be paid by the purchaser.

Plain and explicit shipping directions should be given with every order, naming express office if different from post office, also freight office. Our responsibility ceases when delivered to the express or freight office in good condition. Claims for shortage, or other complaints, must be presented within ten days after arrival of the plant material.

CASH WITH ORDER, except to persons who satisfy us as to their financial responsibility, when accounts will be due in 10 days. C.O.D. orders must be accompanied by one third of the amount involved.

RECOGNIZED AMERICAN HEADQUARTERS

for

JAPANESE ROSEFLOWERING CHERRIES

The Japanese ornamental Cherries are among the most beautiful of all the flowering trees and take the lead possibly because of the popular appeal of the well advertised "Cherry Blossom Time" in Washington, D. C.

They vary a great deal in form and therefore are adapted to many uses in decorating the garden, either as specimens on the lawn, in small groups, for lining lanes and avenues, and as vistas. Vistas are made by a double row of trees placed in pergola-like manner 10 to 12 feet apart across the pergola, and spaced about 6 feet in the rows. One or two varieties should be used for this purpose, preferably one.

The colors of flowers range from pure white, to blush and delicately tinted pinks, on through to deep pinks or old rose. These Cherries will thrive in any reasonably good, well-drained soil, with average moisture. In general, the same soil conditions should prevail under which the fruiting types of cherries do best. These can be grown throughout the same areas as the peach, and even somewhat farther north.

AMANOGAWA ZAKURA, light pink; late; double; **pyramidal** or columnar; just right for formal planting or small gardens. A very unusual sort, attracts favorable attention always—yet very rare. Planted two or three feet apart in a straight line, Amanogawa makes a perfect hedge and need never be pruned or sheared.

AUTUMNALIS (winter flowering), semi-double; pale pink flowers; blooms in Fall and early Spring; very **unusual** and rare. During the mild winter of 1930-31 a pair of old trees in a Philadelphia suburb were in full bloom during the entire holiday season, Christmas and New Years, and it was not a mean petty display, but an abundance of bloom. Yet when spring came, they bloomed just as much it seems. Autumnalis will not bloom during low temperatures in the winter, but responds quickly to a mild period.

BENI HIGAN ZAKURA (Higan Cherry, *P. subhirtella*) "Spring Cherry." First to bloom; very prolific blush pink, small, single flowers that bloom with the last snow of winter. The late "Chinese" Wilson, plant explorer, rates this variety as one of the best of the Japanese Mountain Cherries.

FUJIZAN (Shirotae; Mount Fuji), snow white; large double flowers; vigorous; extra choice. A splendid showy variety, considered one of the better of the white double Japanese Cherries.

HOSOKAWA BENI ZAKURA, pink, mid-season; **upright growth**, slight spread; fragrant.

JEANNE WOHLERT, **dwarf**; semi-double; new; rare. The effect of this tree in bloom is that of many branched hyacinth of a lovely soft pink.

KANZAN ZAKURA (Kwanzan), double deep pink; vigorous; upright. The tendency to spread is not evident until the trees are approximately ten years old. While consulting the Superintendent of the Park System in Washington, D. C., I asked him what variety of Flowering Cherry the public seemed to prefer. He replied, "The variety Kwanzan seems to appeal most to the public."

KOFUGEN ZAKURA (Fugenzo), double, deep pink. Similar to Kanzan, but slower growth. Not likely to grow straight or have a straight stem.

MRS. A. E. WOHLERT, our latest introduction; much clearer and more brilliant color than Kanzan or Kofugen. A great improvement. As soon as enough stock is available of this sort, we perhaps may discard the other two varieties. Kanzan is rated in Washington as a leader, but this variety is superior.

NADEN ZAKURA, pink; late flowering; double; **very popular**; vigorous grower; showy and attractive; adapted for street or lane planting; an excellent companion for Kofugen. This variety, as well as Kanzan and Serrulata albo rosea makes excellent pergolas or vistas, if planted in two parallel rows, 10 to 12 feet apart, with 6 to 8 feet between the trees, in the rows.

OJOCHIN ZAKURA (Chinese Lantern), large, semi-double pink flowers; vigorous; strong-growing.

PAUL WOHLERT, semi-double; deep pink or red; fragrant; flowers in great profusion. The earliest of the large hyacinth flowering varieties.

ROSEA (Rose), late; double flowers about $1\frac{3}{4}$ inches in diameter, borne in raceme-like clusters of three or four flowers; vigorous; a spreading sort; a good lane, shade or street tree. A free bloomer and the flowers open fully just as the leaves commence to develop.

ROSY MORN. This variety is a delicate rich pink, fitting in between Naden and Kanzan. The habit of growth is identical with Naden, but the color is much deeper, while not as deeply colored as Kanzan.

RUTH WOHLERT, blush; midseason; **spreading**. An extra good sort with double flowers of attractive tint.

SERRULATA ALBO ROSEA (Shirofugen), vigorous; light pink; large double flowers; green foliage; late flowering. Similar to Naden and Rosea in habit and color of flowers, but slightly paler.

SHIRO HIGAN, single pink; large flowers; **early**; vigorous. A choice sort. A much improved Yoshino.

SHOGETSU, soft pink; double; large. Has leafy green carpels in center of flower; leaves very pale green. A beauty in every way.

SIEBOLDI is identical with our Naden; at least the difference is not great.

TAIZANFUKUN, flowers single, snow-white; leaves small; grows unusually erect and slender; late. Not well known, but you should by all means plant this variety.

TAKINIOL, flowers of medium size, single and semi-double; buds flesh, open flowers white. Valued for its delightful fragrance.

SARGENTI (Yama; *Prunus serrulata sachalinensis*), single, large flowers of light red violet; early; spring foliage copper beech color, green in summer; a popular sort; **very hardy**; probably the hardiest of all the varieties with the possible exception of Beni Higan, which may be as hardy against cold and low temperature. Considered one of the best for New England.

YOSHINO (*Yedoensis*), single blush; red buds; early. This is the tree that borders the Tidal Basin in Washington, D. C. The chief value of this variety, as I see it, is that it blooms so extremely early and in such profusion, that it is quite a revelation after the long winter. Very few trees or shrubs, excepting Beni Higan, Weeping Cherry and Forsythia, are in bloom before Yoshino flowers. Therefore, the planting of this exceedingly beautiful tree is particularly to be recommended. It opens the season of flowers. Mr. Baxter, Horticulturist of Fairmount Park, Philadelphia, is definitely of the opinion that this is the variety that should be featured in parks because it gives "a blaze of glory all at one time that is not equalled by any other early spring flowering tree." There is no objection in planting this variety in such a manner that the branches will lie on the ground. If that effect is wanted, they should not be planted too closely, and the low branches should not be removed.

YOSHINO DAYBREAK, delicate flesh pink; single flowers so dense as to almost obscure the branches. Flowers are a deeper color and larger than Yoshino.

Prices of Japanese Roseflowering Cherries:

	18-24"	24-30"	30-36"	3-4'	4-5'	5-6'	6-7'
Amanogawa	\$1.00	\$1.50	\$2.50	\$3.50	\$4.00	\$5.00	\$6.50

8 to 9 ft.	7.50	12 to 15 ft. "	25.00

JAPANESE WEeping CHERRIES

SHIDARE HIGAN ZAKURA (*Prunus Subhirtella Pendula*, var. *Rosea*). Single; pink; early; after Beni Higan, the first tree to bloom in the spring and the first deep pink flowers of the season. It is safe to say it is the first flowering tree of the season in the suburbs of Philadelphia.

Standards or Tree Form (umbrella shaped). Top-pruned, ready for planting:

5 ft. stem, light crown or top.....	\$5.00
5 ft. stem, 3 yr., heavier top.....	7.50
5 ft. stem, 3 yr., extra selected.....	10.00
Packing extra.	

Pyramid or Bush Form, branched from ground up, own roots:

2 to 3 ft. high	\$3.50
3 to 4 ft. high	4.50
4 to 5 ft. high	6.00

Specimen trees, 10-12 ft. and up, \$25.00 to \$50.00

Larger Specimen trees, 12-14 ft. high and wide, from \$75.00 to \$100.00 and up. All root pruned.

We have several other forms of Weeping Cherry of the subhirtella family, one of which is **double** flowering. It seems to stay in bloom somewhat longer than the single flowering. The color is identical, but the flowers are very full with approximately two dozen petals. We can supply this variety at an additional charge of \$1.00 on most of the sizes we offer above in both the pyramid and standard forms.

Another form we are introducing, and which we are temporarily calling "Fringe Cherry," was propagated from a tree on the property of one of our friends in the vicinity of Philadelphia, who bought a section of an old estate that had been planted to a fine collection of exceptionally rare trees, among them this unusual Weeping Cherry. The flowers are practically white, the branches are thin, pendulent, with small flowers placed so closely on the drooping branches that the effect at a distance is that of a rice curtain, or should I say a tree draped with white fringes. We have been propagating from this tree for several years, but the tree was so decrepit that it was difficult to obtain any wood worthwhile in spite of the hearty co-operation of the owner. We have finally succeeded and can offer the following:

Standard Form	\$7.50 and \$10.00 each
1 yr. old plants	4.00 each
2 yr. old plants	5.00 each

SHIDARE YOSHINO (Weeping Yoshino). Large, single, pure white flowers. Branches much thicker than on Shidare Higan, but spaced further apart. The leaves are much larger. The picturesque shape of the tree with or without flowers or leaves is very attractive.

Pyramid or Bush Form:

2 to 3 ft.	\$4.00
3 to 4 ft.	5.00
4 to 5 ft.	6.00

A few very large specimens are available. Prices on application.

ACER PALMATUM (Japanese Maple)

A. Palmatum Atropurpureum (Scarlet Japanese Maple). Scarlet in the summer as well as in the spring.

18 to 24 in.....	\$1.50	4 to 5 ft.....	\$15.00
2½ to 3 ft.....	7.50	5 to 6 ft.....	20.00
3 to 4 ft.....	10.00	6 to 7 ft.....	25.00

- A. *Palmatum Atropurpureum Novum*** (Red-leaf Japanese Maple). Dark red in summer; scarlet in early spring.

	Each		Each
1½ to 2 ft.....	\$2.00	2½ to 3 ft.....	\$6.00
2 to 2½ ft.....	4.00	3 to 4 ft.....	7.50

- A. *Palmatum Dissectum*** (Weeping cut-leaf or fern-leaf Japan Red-leaf Maple).

Low and slow-growing type; very rare and scarce, spreading branches.

3 ft. wide	\$15.00	5 ft. wide	\$30.00
4 ft. wide	20.00	6 ft. wide	40.00

Crating extra, on this variety only.

- Regular, ordinary Japanese Maple.** Red in spring and autumn, green in summer.

15 to 18 in.....	\$1.50	4 to 5 ft.....	\$6.00
18 to 14 in.....	2.50	5 to 6 ft.....	10.00
24 to 30 in.....	3.50	6 to 7 ft.....	15.00
		7-8 ft. x 7-8 ft.....	\$20.00

- AESCULUS** (Horsechestnut). Pink flowering.

4 to 5 ft.....	\$4.00	7 to 8 ft.....	\$7.50
6 to 7 ft.....	6.00	10 to 12 ft.....	10.00

- AMYGDALUS PERSICA** (Double Flowering Peach). The most showy and colorful of all the Flowering Trees without exception. The colors are striking and range from the deepest and most brazen reds to the most delicate pale pinks and snow white. A 3 or 4 year old tree is one mass of color from top to bottom. It is also one of the trees where you can get the most for your money in quick results, as it is unquestionably the fastest growing of all the Flowering Trees, but it never attains a very great height or spread.

Double Pink, Double Red or Double White Flowers:

3-4 ft.	\$1.00	4-5 ft.	\$1.50	5-6 ft.	\$2.00
--------------	--------	--------------	--------	--------------	--------

Aurora—double pale pink, 5-6 ft., \$3.00.

Aurora—double pale pink, 7-8 ft., \$5.00.

Clara Meyer—double clear pink, 2½-3 ft., \$1.50.

Clara Meyer—double clear pink, 3-4 ft., \$2.00.

Early Red—double red (very early), 4-5 ft., \$3.50.

- ARONIA ARBUTIFOLIA** (Red Chokeberry). The fruit is conspicuously attractive in the garden and to a minor degree to birds. Best red fruited native shrub.

2 to 2½ ft. covered with fruit	\$1.50 ea., \$12.00 per 10
2½ to 3 ft. covered with fruit	2.50 ea., 20.00 per 10

AZALEAS

- A. *Amoena*** (Sunset Azalea). Evergreen. The color of the sunset, extremely effective in the soft light of the evening at sunset and after; most restful coloration; not at its best in the glare of full sunlight. Grows best in the open. Flowers are double or hose in hose of a lovely purple produced by the thousand, obliterating the foliage.

	Each
3 ft. wide x 2½ ft. high	\$5.00
3½ ft. wide x 2½ ft. high	7.50
4 ft. wide x 3-3½ ft. high	10.00
4½ ft. wide x 3½ ft. high	15.00
5 ft. wide x 3½ ft. high	20.00

Azaleas continued

A. Hinodegiri (Sunrise Azalea). Rosy red. Evergreen. Most effective in front of Evergreens.		
	Each	10
10 to 12 in. wide.....	\$1.60	\$15.00
12 to 15 in. wide.....	2.10	20.00
15 to 18 in. wide.....	3.00	25.00
18 to 20 in. wide.....	4.00	35.00
20 to 24 in. wide.....	5.00	40.00
26 to 28 in. wide.....	7.50	60.00
2½ ft. wide	10.00	90.00
3 ft. wide	15.00	135.00
3½ ft. wide x 3 ft. high.....	25.00	200.00
4 ft. wide	30.00	300.00

A. **INDICA ALBA** (also known as *Ledifolia alba*). Evergreen, fragrant, snow white, large single flowers; blooms normally here about Memorial Day or earlier.

24 to 30 in.....	\$6.00
3 ft. wide x 2½ ft. high.....	12.50
3½ ft. wide x 2½ ft. high	17.50
4 ft. wide x 2½ ft. high.....	25.00
4½ ft. wide. x 2½ ft. high.....	30.00
5 ft. wide x 3 ft. high.....	35.00
5½ ft. wide x 3 ft. high.....	40.00
6 ft. wide x 3½-4 ft. high.....	50.00

Our strain or variety of this choice Azalea is very much superior to any offered anywhere in Pennsylvania. Larger bloom and more of them; purer white; more fragrance.

A. **KAEMPFERI HYBRIDS**. Tall growing deciduous shrubs, hardy and free flowering. Blooms in May. Color range: pink, rose and red, mixed.

1½ to 2 ft.....	\$3.00	\$25.00
2 to 2½ ft.....	4.00	35.00
2½ to 3 ft.....	5.00	45.00

A. **MOLLIS**. A hardy, prolific, deciduous Chinese Azalea, in orange and pure yellow.

Pure yellow, 12 to 15 in.....	\$4.00	\$30.00
Pure yellow, 15 to 18 in.....	5.00	40.00
Pure yellow, 18 to 21 in.....	6.00	45.00
Orange, 15 to 18 in.....	4.00	30.00
Orange, 18 to 24 in.....	5.00	40.00

A. **MUCRONULATA**. Upright growing, compact branches, splendid foliage, extremely early flowering, violet colored flowers of good size produced in extreme abundance.

2 ft.	\$3.50	\$27.50
2½ ft.	4.00	35.00
3 ft.	4.50	40.00
3½ ft.	5.00	45.00

A. **SCHLIPPENBACHI** (The Royal Azalea). A lovely deciduous azalea, hardy and vigorous, brought by us from Korea and produced here from seeds from the originally imported plants. The flowers are large, single, clear pink; the leaves shaped like those of the oak. Transplanted 1938.

18 to 24 in. high	\$3.50	\$30.00
24 to 30 in. high.....	4.50	40.00
30 to 36 in. high.....	6.00	50.00

BERBERIS (Barberry).

- B. Thunbergi** (Japanese Barberry). Green foliage turning scarlet in fall; bright red berries.—Ideal for hedges.

	10	100	1000
12 to 15 in.....	\$2.25	\$18.00	\$125.00
15 to 18 in.....	3.00	20.00	160.00
18 to 24 in.....	4.00	35.00	200.00
24 to 30 in.....	5.00	40.00	250.00

- B. Thunbergi Atropurpurea** (Red Japanese barberry). Similar to the green-leaved Japanese Barberry, but the foliage of this new variety is a rich, bronzy-red, and becomes more gorgeous throughout the summer; in the fall it changes to vivid orange, scarlet and red shades. Should be planted in full exposure to sun to obtain its brilliant coloring.

	Each	10	100
12 to 15 in.....	\$.40	\$3.75	\$27.50
15 to 18 in.50	4.50	35.00
18 to 24 in.....	.75	6.00	50.00
24 to 30 in.....	1.50	12.00	100.00

BETULA (Birch).

- B. Alba** (European White Birch). These specimens were cut back to the ground and many stems have grown out from the ground, which produce the right and desirable effect.

For Spring, 1940—5 to 6 ft. high.....	\$4.00 each
For Fall of 1940—6 to 7 ft. high.....	5.00 each

Small seedlings for mass planting:

12 to 15", 5 for 75c; 10 for \$1.25.

- B. Alba Fastigiata** (Pyramidal White Birch).

6 to 8 ft. high	\$4.50 each
-----------------------	-------------

- B. Alba Laciniata** (Cut-leaf Weeping Birch). White bark, weeping branches.

5 to 6 ft.....	\$3.00 each; \$25.00 per 10
6 to 8 ft.....	4.00 each; 35.00 per 10
8 to 9 ft.....	5.00 each; 45.00 per 10

BUXUS SUFFRUTICOSA (Dwarf English Boxwood). The Dwarf Box, hardy type.

The plants we offer are 24 years old.

16 to 18 in. high	\$4.00	22 to 24 in. high.....	\$6.00
18 to 20 in. high.....	5.00	24 to 26 in. high.....	7.50

We offer smaller sizes for bordering walks, edging flower beds and rose gardens:

5-6 in.	\$.50 each; \$4.00 per 10
6-8 in.	1.00 each; 9.00 per 10
8-10 in.	1.50 each; 12.50 per 10
10-12 in.	2.00 each; 15.00 per 10

CASTANEA (Sweet Chestnut). Hybrid Sweet Chestnut producing a heavy crop of fruit when less than 8 years old. This variety is immune against chestnut blight. The fruit is as sweet as the susceptible old-time American Sweet Chestnut, but varies considerably in size—from the size of the old-time Chestnut up to the size of the Sweet Spanish Chestnut.

Young plants	\$.75 each; \$5.00 per 10
3 year old trees.....	1.50 each; 12.50 per 10

CEDRUS ATLANTICA GLAUCA (Blue Atlas Cedar). Similar to the Cedar of Lebanon that King Solomon and Hiram, King of Tyre, made famous when they built the Temple. Our trees were transplanted recently and have good roots.

10 ft. high x 8 ft. wide.....	\$35.00 each
12 ft. high x 8-9 ft. wide.....	40.00 each
14 ft. high x 9-10 ft. wide.....	50.00 each

One of our trees grew into a nice specimen in Cynwyd. The owner refused a cash offer of \$1,000 for it.

CHAMAECYPARIS (*Retinospora*).

Retinospora obtusa gracilis (Slender Hinoki Cypress). The one good and valuable variety in the entire family of *Chamaecyparis*. Slow growing and are not likely to grow out of bounds. All the following were transplanted within two years and are perfect plants.

2 to 2½ ft....	\$3.50	\$32.00	3½ to 4 ft....	\$7.50	\$65.00
2½ to 3 ft....	4.00	37.50	4 to 4½ ft....	8.50	75.00
3 to 3½ ft....	6.00	50.00	4½ to 5 ft....	9.00	85.00
			5 to 6 ft....	12.00	100.00

Specimens 12 ft. high, 3 ft. wide at base and top,
perfect columns, \$40.00 to \$50.00.

Retinospora obtusa nana. The kind the Japanese use for the making of "300 year old" trees. Ours are 16 years old, and 24 to 36 inches high—\$7.50 to \$20.00 each.

Retinosporas in all the common sorts at the following prices:

2 to 2½ ft....	\$2.00 each	4½ to 5 ft....	\$6.00 each
2½ to 3 ft....	3.50 each	5 to 6 ft....	7.00 each
3 to 3½ ft....	4.00 each	6 to 7 ft....	8.00 each
3½ to 4½ ft....	4.50 each	8 to 9 ft....	10.00 each
12 to 18 ft....	\$35.00 to \$50.00 each		

CHIONANTHUS VIRGINICA (White Fringetree). Large growing shrub; very fragrant white fringed flowers in 12 inch clusters. Native choice small tree

2 to 3 ft....	\$1.00	6 to 7 ft....	\$7.50
3 to 4 ft....	2.00	7 to 8 ft....	10.00
4 to 5 ft....	3.50	8 to 9 ft....	15.00
5 to 6 ft....	5.00		

CLEMATIS

CLEMATIS, hardy varieties. Thrives best in a rich garden loam of rather light texture. Sand and peat moss may be added to a heavy soil to loosen it. When planting, spread out the roots flat and sprinkle soil lightly over them. Avoid having all the roots in one bunch. Soil must be well drained where Clematis is to be planted. Since Clematis is partial to lime, it should be mixed with the soil when planting, and if necessary it may be occasionally added thereafter, working it well into the soil without disturbing the roots.

Large-Flowering Varieties

Ascotiensis, azure blue.....	\$1.50	Lady Caroline Neville, white with mauve bars	\$1.75
Belle of Working, double, silvery gray	1.75	Lady Northcliff, lavender, blue and purple	1.75
Comtesse de Bouchaud, rose pink	1.50	La France, blue	2.25
Crimson King, red	2.25	Lawsoniana, large, sky blue.....	1.50
Duchess of Albany, bright pink..	1.75	Lord Neville, plum color	1.50
Duchess of Edinburgh, double, pure white	1.25	Mme. Baron Veillard, silvery pink	1.25
Elsa Spath, bright blue.....	1.50	Mme. Edouard Andre, red.....	1.25
Empress of India, light violet purple	2.25	Mr. G. J. Patijn, dbl. pale blue...	2.50
Gipsy Queen, violet-purple.....	2.00	Mrs. Cholmondeley, light blue...	1.50
Henryi, large white flowers.....	1.25	Nelly Moser, mauve and white...	2.00

Cornus continued

C. Florida rubra (Red flowering Dogwood). This variety is listed according to the nurseryman's individual idea as pink dogwood or red dogwood, but in every case it covers the same variety. When the flowers of the Red Dogwood are unfolding during a cool season, they will be deep pink or red. If the season is warm, the flowers will be paler, but yet distinctly colored. Deep Pink would be a good description.

	Each	Ten		Each

Pale Pink. This variety was raised by us from seed chosen from selected deep pink Flowering Dogwood. We selected trees producing the largest and the best shaped flowers with the expectation of developing new varieties. Many choice shades of color were found among the trees when they bloomed. We made a definite selection with pale pink flowers, and are offering these in our price list for the first time. The depth of color of this variety is likely to vary somewhat with the season, as indicated in the description of the Red Flowering Dogwood.

8 to 9 ft.....	\$15.00
9 to 10 ft.....	25.00

----------------	-------------	----------------	-------------

CRYPTOMERIA (Japan Temple Tree).

C. Japonica Lobbi. A stately strong growing evergreen tree. General outline is columnar; spread or width generally one-third of height.

	Each	10		Each	10
2½ to 3 ft.	\$2.50	\$22.50	10 to 12 ft.	\$15.00	\$120.00
3 to 3½ ft.	3.75	35.00	12 to 14 ft.	20.00	150.00
3½ to 4 ft.	5.00	40.00	14 to 16 ft.	40.00	300.00
4½ to 5 ft.	6.00	45.00	16 to 18 ft.	75.00	650.00
5 to 6 ft.	7.50	50.00	18 to 20 ft.	100.00	800.00

The low prices on these Cryptomeria may lead you to believe that the trees are seconds and not desirable. Quite the contrary. The 10-12 ft. and 12-14 ft. trees are located on a piece of land we want to clear and sell and we have decided to make the price low enough so it will be attractive to quantity buyers such as land developers. Cryptomeria makes a most attractive tree for lining streets—they are stately, tall growing, comparatively fast growing, requiring little or no care after they are planted, will not overshadow the lawn and destroy hedges and other plants—on straight lanes and roads they are very effective—impressive when used in the general planting scheme around a dwelling or public buildings.

C. Japonica Wohlerti (Wohlert's variety). A superior compact-growing sort, slower than "Lobbi", but the branches are placed much closer, giving a smooth outline; resistant to low temperatures.

2 to 2½ ft.	\$4.00 each	3 to 3½ ft.	\$6.00 each
2½ to 3 ft.	5.00 "	3½ to 4 ft.	7.50 "

9 to 10 ft. \$25.00 each

8 to 9 ft. 20.00 "

10 to 12 ft. 35.00 "

MALUS—Flowering Crab.

The Chinese Flowering Crab has justly been called the "Queen of the Garden." Even though Crabs are not so well known as the Cherries, several varieties have no rivals among the Flowering Trees. About the same directions apply as for the Japanese Cherries, with the exception that Crabs have a wider range of adaptability to soil; wet or dry, rich or poor. Of course, they respond with more growth to good soil and culture. Some varieties, such as *Atrosanguinea*, will stand shearing especially well. They may be sheared into a pyramidal, standard or ball-shaped tree. All pruning and shearing are done after the flowers have passed.

The varieties *Atrosanguinea* and *Floribunda* lend themselves particularly well to planting as hedges. They are 100% hardy anywhere and will stand clipping or shearing into a typical hedge, or if desired they may be permitted to grow tall enough to be a sheared screen. They would make an effective hedge in New England, or any other Northern State with cold winter climate, where privet is an impossibility. The foliage is glossy, fairly small, and very attractive. The trees will flower just as well in a clipped hedge as when growing naturally, un-sheared. If 2-3 ft. trees are used, they should be spaced 2 ft. apart, and for the 3-4 ft. size the spacing should be 2½ ft.

In more recent years Garden Clubs have begun to appreciate the value of colorful fruits, and it is not overstating the fact that Flowering Crabs, such as *Eleyi*, *Hopa*, *Floribunda Purpurea*, and many others, have absolutely the most colorful fruit in existence. These trees are hardy anywhere, which is more than can be said for the Cherry trees in Vermont, Maine, and the Dakotas.

M. Aldenhamensis. A new crab from England; a good red flower; medium sized colored fruit. The secondary crop of bloom in September is double flowers.

M. Arnoldiana (Arnold C.), semi-double; pink; early flowering; splendid foliage; yellow fruit; very popular.

M. Atrosanguinea (Carmine C.), single; red; bush form; early flowering. It may be used in varied positions: as a screen, or a perfect hedge 8 to 10 feet high. Lends itself to shearing, and can be sheared into columns, arches, hedges, and round-headed standards as perfectly molded as a ball.

M. Baccata, fragrant, white flowers; yellow fruit tinted red on sunny side; growth vigorous, pyramidal or cone shaped tapering to the top from a broad base. Fruit fine for jelly.

M. Baccata Ceracifera, cherry-like pendulous fruit; fragrant white flowers. The conspicuously attractive fruit is excellent for jelly.

- M. Eleyi.** The best red-leaf sort in the spring coloring. Occasionally the tree will retain its color throughout the entire season, from spring until fall, but most of the trees turn green during the summer. The fruit is brilliant scarlet and very conspicuous; of excellent quality for jelly. During flowering period the tree is smothered with large red flowers in clusters.
- M. Floribunda.** Single; pink; early; spreading. Yellow fruit, slightly tinted red. An old, well-known variety and for that reason one of the best sellers.
- M. Floribunda-Purpurea,** one of the best; copper beech color foliage and flowers of beautiful red-violet; dark purple fruit, which is retained on the tree from August until late November. When the tree is in bloom, it is absolutely covered with deep purple blossoms more densely than any other variety with the exception of Hopa and Eleyi. Standard or Tree Form.
- M. Hopa,** large flowering, purple leaf Crab. Very hardy and prolific bloomer; showy dark red fruit which is very colorful from August until late in November; quite formal and shapely growth. Red flowers. Foliage green during the summer. Has a distinct tendency to form a central leader; decidedly more regular in habit than most of the foregoing, with the exception of the two varieties of Baccata.
- M. Micromalus** (Midget C.), flowers pink tint; single; dwarf habit. An extra choice sort. NEW. Compact growth, vase form. The long, slender branches covered with flowers suggest garlands of flowers. Real quality, a prime sort.
- M. Niedzwetzkyana.** Red flowers, large red fruit, foliage exactly like fruiting apple leaves. The apples are good, and that is the only reason we are listing this variety. As a flowering tree it is not nearly so desirable as any of the rest because it is extremely dilatory about coming into bloom. It has to reach a definite degree of maturity before there will be any flowers. It is really an apple, and not a crab.
- M. Scheideckeri.** Double; pink; free flowering; fruit excellent for jelly. One of the most conspicuous pink flowering trees of early spring; very hardy; an old sort.
- M. Spectabilis Rosea Plena.** Very large double pink flowers profusely produced; yellow fruit. Rare and good. One of the better double flowering varieties.
- M. Spectabilis White.** A white form of the above. Double flowers; yellow fruit.
- M. Theifera.** Used for tea making in China; lovely pink bloom; glossy foliage; upright habit. (Not the tea plant, but a Chinese substitute.)

Prices of above 15 varieties of Flowering Crabs:

	Each	10		Each	10
18 to 24 in. . .	\$0.75	\$7.00	4 to 5 ft.	\$2.50	\$24.00
24 to 30 in. . .	1.25	10.00	5 to 6 ft.	3.50	30.00

- M. Ioensis Bechteli** (Bechtels Crab). The familiar, fragrant, double rose-like variety.
- | | | | |
|-------------------|--------|-------------------|--------|
| 18 to 24 in. | \$1.00 | 5 to 6 ft. | \$4.50 |
| 24 to 30 in. | 1.50 | 6 to 7 ft. | 6.00 |
| 30 to 36 in. | 2.50 | 10 to 12 ft. | 35.00 |

- M. Parkmani** (Halliana; Parkman C.) double, pink. A dwarf tree, very low growing, just right for small gardens, very hardy, flowers an exceptionally lovely pink. Prolific, one of the first to open and one of the last to fade.

- M. Red Silver.** A new variety; silver coated foliage; red flowers. The trees originated in South Dakota, and I have not seen the fruit nor the flowers.
- M. Red Tip.** A new variety of great merit; short stemmed red or pink flowers, similar in distribution to plum blossoms; a vigorous grower; an unusual sight while in bloom.

Prices of above 3 varieties:

15 to 18 in.	\$1.00	24 to 30 in.	\$1.75
18 to 24 in.	1.25	30 to 36 in.	2.50

- M. Sargenti** (Sargent's C.). Dwarf; white flowers; abundant showy red fruit. Good for the small garden and a great favorite on account of the brilliant fruit; with the birds equally popular. Low growing and spreading habit; just the sort for rockeries and small gardens. One of the more striking varieties. Positively true to name. Good for a hedge up to six feet high if trained or sheared; will keep out intruders, even cows and dogs.

12 to 15 in.	\$1.00	18 to 24 in.	\$2.00
15 to 18 in.	1.50	24 to 30 in.	3.50

ALL HAVE PERFECT ROOT SYSTEM AND GOOD TOPS. DO NOT PRUNE OR CUT BACK. OUR TREES CAN SUPPORT ALL THE TOP BECAUSE YOU GET 100% OF THE ROOTS.

STANDARD FORM of Crabs in heavy specimen trees are available in most varieties, such as *Atrosanguinea*, *Eleyi*, *Hopa* and *Floribunda*.

ATROSANGUINEA STANDARDS:

	Each	10
4 ft. trunks, formal type, 7-8' overall	\$7.50	\$70.00
4 ft. trunks, formal type, 8' overall	10.00	80.00
4-5 ft. trunks, 8-10' overall	25.00	200.00
5 ft. trunks, 12-14' overall	\$35.00 to \$50.00 each	

IF *MALUS ATROSANGUINEA* OR *FLORIBUNDA* ARE WANTED FOR HEDGE PURPOSES, A SPECIAL QUOTATION WILL BE GIVEN. MENTION HOW MANY LINEAL FEET YOU WANT TO COVER.

OPHIPOGON JABURAN (Lily Tufts). Blue flower spikes well over the foliage; the curving foliage is 12 inches long, and stays in good condition winter and summer. When Lily Tufts are planted in rows they form the perfect edging (border) plant, enclosing the flower beds perfectly if planted one foot apart.

From 3" pots, 50c each; \$3.50 per 10; \$30.00 per 100.

PACHYSANDRA TERMINALIS (Japanese Spurge). A beautiful evergreen ground cover, perfectly hardy, and endures dense shade and dry locations. Fertile soil, fairly rich in humus is required, also watering until the plants become established.

Established plants are twelve inches high.

14 to 16 ft.	3.50	30.00	150.00

PRUNUS (Plum, Cherry, Apricot). The horticultural varieties of Japanese Flowering Cherries are listed in front of the price list.

P. Bliariana (Red-leaf Plum). Double, pink flowers; purple leaves. Red all summer and scarlet in autumn.

5 to 6 ft.	\$3.50 each	6 to 7 ft.	\$4.50 each
-----------------	-------------	-----------------	-------------

P. Newport. The best red-foliaged plum, but the flowers are not so attractive as those of Bliariana.

2½ to 3 ft.	\$1.10 each	\$10.00 per 10
------------------	-------------	----------------

P. Othello. Splendid, brilliant red leaves.

5 to 6 ft.	\$3.00 each	7 to 8 ft.	\$4.50 each
6 to 7 ft.	3.50 "	8 to 9 ft.	5.00 "

P. Tomentosa (Dwarf Flowering Plum). A multitude of dainty shell-pink flowers in spring and lovely glass-like translucent fruit of bright red in autumn.

2 to 3 ft.	\$1.25 each	4 to 5 ft.	\$2.50 each
3 to 4 ft.	1.50 "		

P. Triloba (Flowering Plum). Very desirable low shrub with a mass of clear pink flowers.

3 to 4 ft.	\$2.00 each	4 to 5 ft.	\$2.50 each
-----------------	-------------	-----------------	-------------

P. Mume (Japanese Apricot). Very early flowering, and a most lovely tree of delicate colorings.

Dawn, 3 to 4 ft.	\$2.50 each
Early Double Pink, 6 to 8 ft.	4.00 "
Early Double Red, 5 to 6 ft.	4.00 "
Mme. Dorbon, dbl. shell pink, 4 to 5 ft.	3.50 "
Mme. Dorbon, dbl. shell pink, 5 to 6 ft.	4.00 "

P. Glandulosa Sinensis (Double Pink-flowering Almond).

3 to 4 ft.	\$1.25 each	\$10.00 per 10.
-----------------	-------------	-----------------

RETINOSPORA. (See *Chamaecyparis*).

RHODODENDRON HYBRIDS:

Album elegans. White; a rapid growing tall variety, recommended for back-grounds.

Amphion. Pink, with white eye; good forcing variety; hardy.

Catawbiense album. White; good compact habit; very hardy.

Catawbiense grandiflorum. Lilac; good compact habit; buds very heavily and is extremely hardy.

Dr. Dresselhuys. Red; the best tall growing hardy red variety.

Ignatius Sargent. Light red; a rapid vigorous grower; very hardy.

Lee's Dark Purple. Dark purple; extremely hardy, having a large number of buds.

Mrs. C. S. Sargent. Light red; a good variety of compact, bushy habit.

President Lincoln. Lavender; tall growing, extremely hardy.

Roseum elegans. Orchid-pink; a very productive variety which makes compact globular specimens; very hardy.

Prices of well budded plants:

	Each	Ten
15 to 18 in.	\$4.00	\$35.00
18 to 24 in.	5.50	45.00
24 to 30 in.	6.50	55.00

Larger sizes can be had in some of the varieties.

SALISBURIA ADIANTIFOLIA (Ginkgo biloba, Maidenhair tree). A tree that can trace its pedigree in a straight line to the deposits of anthracite coal in which many of its progenitors are preserved. All of its insect pests have died meanwhile and it is immune to all present-day bugs. It is hardy, moderately fast to slow growing, long living; a splendid shade tree.

	Each	10	100
5 to 6 ft.	\$2.50	\$20.00	\$150.00
6 to 7 ft.	3.00	25.00	175.00

12 to 14 ft.	10.00	75.00	

SALIX (Willow).

S. Babylonica (Babylon Weeping Willow). An extremely pendulous variety of Weeping Willow. Branched to the ground, straight and exceptionally beautiful trees.

10 to 12 ft. \$5.00 each \$45.00 per 10

S. Babylonica Annularis (Ringleaf Weeping Willow, or Corkscrew Willow). A most unusual tree. During 1939 our entire stock was sold to Botanical Gardens.

6 to 8 ft. \$7.50 each

SORBUS AUCUPARIA (European Mountain Ash). Also known as Rowan Tree. According to Aesop, "the birds in the top of the tree were eating the beautiful orange and red colored fruit, and the fox did not care for it because it was sour anyway." Be that as it may, it is one of the most lovely of all the fruit-bearing ornamental trees.

2 to 3 ft. \$1.00 each 3 to 4 ft. \$1.50 each

SPIREA VAN HOUTTEI. A fine shrub for lawn specimen or massing; white flowers in May. The young plants we offer will reach a height of 30 inches to 3 feet the first year after planting under normal conditions.

18 to 24 inches \$.50 each \$3.00 per 10

STYRAX OBASSIA (Fragrant Snowbell). Grows to an ultimate height of 20 ft. A Small Japanese tree; leaves 10 inches long, nearly orbicular to oval, pubescent beneath; flowers fragrant, white, in many flowered racemes 8 inches long; fruit $\frac{3}{4}$ inch long.

2 to 3 ft.	\$2.00 each	5 to 6 ft. heavy ..	\$5.00 each
3 to 4 ft.	3.00 "	6 to 8 ft. heavy ..	6.50 "
4 to 5 ft.	4.00 "	8 to 9 ft. heavy ..	7.50 "

SYRINGA (Lilac). All our Lilacs are either root grafted and planted deep enough to make their own roots or they are grown from cuttings.

Hybrid Varieties:

Belle de Nancy—satiny rose-white center, double, fragrant.	8-12"
Hugo Koster—single lilac with reddish-tint.	8-12", 2-3'
Jan Van Tol—single white.	8-12", 2½-3'
Katherine Havemeyer—double blue.	8-12", 3½-4'
Lamartine—single lilac, early.	8-12", 4-5'
Ludwig Spaeth—single violet.	8-12"
Marie Legray—single white.	2-3'
Mme. Casimir Perier—double white.	8-12", 2-3', 4-4½'
Mme. Lemoine—double white.	8-12", 3-4'
Montaigne—single pink, very tall.	8-12", 3½-4'
Mont Blanc—single white.	8-12", 3-3½'
Mrs. Edw. Harding—double red.	8-12", 2-3'
President Faillieres—double pale lavender.	8-12", 2-3'
President Viger—double purple tipped deep pink.	8-12"
Ruhm von Horstenstein—single red, tall.	8-12", 3-4'
Vestale—single white.	8-12", 3-4'
Waldeck Rosseau—double violet.	8-12", 3-4'
8-12 in.	\$.35 each \$3.00 per 10
2-3 ft.	2.00 "
3-4 ft.	3.00 "
4-5 ft.	3.50 "

Our supply is strictly limited, and we may not be able to fill your order in the variety and size asked for. We reserve the right to substitute if we are sold out.

TAXUS (or Yew Trees). European and Oriental.

Taxus Baccata (English Yew). Capitata form, upright, suitable for hedges. Dark green foliage—darker than Japan Yew.

	Each	10	100
15 to 18 in.	\$2.50	\$20.00	\$150.00
18 to 24 in.	3.00	25.00	175.00
24 to 30 in.	4.00	30.00	200.00

Taxus Baccata Fastigate (Irish Yew). Strong shapely trees; columnar.

	Each
Mature solid plants, 5 ft.	\$15.00
Specimen trees, 6 ft.	20.00
Specimen trees, 6½ ft.	25.00

Taxus Cuspidata (Spreading Japanese Yew). Well shaped and transplanted

	Each	Ten
2 to 2½ ft. wide, sheared	\$3.50	\$30.00
2½ to 3 ft. wide, sheared	4.00	35.00
3 to 3½ ft. wide, sheared	5.00	45.00
3½ to 4 ft. wide, sheared	7.50	70.00
4 to 5 ft. wide, sheared	10.00	
5 to 6 ft. wide, 4 to 5 ft. high, sheared	20.00	
6 to 7 ft. wide, 5 ft. high, sheared	25.00	
7 to 8 ft. wide, 6 ft. high, sheared	30.00	
8 to 9 ft. wide, sheared	50.00	
10 ft. wide, sheared	60.00	

If you select your own trees, you may take the largest available. We measure and charge for the spread only.

If you compare the prices of these Yews with the price lists of other reputable firms, you may be led to believe that ours might be inferior specimens. That is not the case. Nearly all of our Yews are exceedingly fine plants. Most of them were transplanted the Spring of 1938, others the year before. Therefore, they will continue to grow immediately after being planted in the new location. If you see these plants you will never hesitate to buy them if you have room for them.

Taxus Cuspidata Capitata (Upright Japanese Yew.) Upright growing, cone-shaped trees—horizontal branches, red fruit, sheared trees.

When this variety is ordered for hedge purposes in the 18 to 24 in. or 24 to to 30 in. sizes, we will select the plants particularly adapted to the purpose, and allow a discount of 10% on the hundred rate, when more than 25 are bought.

	Each	10	100
18 to 24 in., for hedges and other uses	\$3.50	\$25.00	\$200.00
24 to 30 in., for hedges and other uses	4.00	35.00	225.00

T. Caroliniana (Carolina Hemlock Spruce).

	Each
10 to 12 ft.	\$25.00
12 to 14 ft.	35.00

THUJA (Arborvitae). Pyramidal and American Arborvitae for hedges and screens.

	Each	10	100
8 to 9 ft.	\$5.00	\$40.00	\$300.00
9 to 10 ft.	7.50	50.00	350.00
10 to 12 ft.	10.00	75.00	400.00
12 to 14 ft.	15.00		

VINCA MINOR (Periwinkle or Trailing Myrtle). A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees, or on graves. Blue flowers.

\$1.50 per 10

\$10.00 per 100

BOWLES VARIETY—A new form more desirable than the common type.

Flowers larger, deeper blue and borne with remarkable profusion, and also produced during the autumn.

35c each; \$20.00 per 100.

WISTARIA. We particularly recommend the Oriental Wistaria as an ornamental vine available in a large assortment of varieties and colors, including lavender, purple, pink and white. The flower clusters range from 10 inches on the Chinese, to the long cluster varieties of the Japanese Wistaria, reaching four feet or more on the varieties Kyushaku, Penn Valley and Naga Noda.

The following prices cover vines of various ages, also Standards or Tree Form. The Standards are graded according to the caliper of the trunk and spread of the crown.

A non-removable tag will be attached to each Wistaria. It is your guarantee that the plant is true to name and in good condition. If it fails to grow, a free replacement will be made if you pay packing and transportation charges.

JAPANESE WISTARIA (Wistaria Floribunda, or Multijuga). Grafted Plants.

COLLECTIONS

"Rainbow" Collection \$50.00

- 8 Cherries and 6 Crabs, 5-6 ft.
 - Kofugen, dbl. deep pink
 - Fujizan, dbl. white
 - Naden, dbl. pink, late
 - Beni Higan, sgl. bluish, early.
 - Rosy Morn, dbl., old rose
 - Yoshino, sgl. bluish pink
 - Shirofugen, light pink
 - Weeping Cherry, sgl. pink
 - Atrosanguinea Crab, sgl. carmine
 - Hopa Crab, sgl. red, apricot colored fruit
 - Eleyi Crab, sgl. red, red fruit
 - Floribunda Purpurea, sgl. red fl., purple fruit
 - Spectabilis rosea plena, dbl. pink fl., yellow fruit
 - Micromalus, sgl. pink
- \$61.00 Value for \$50.00**

"Early" Collection \$16.00

- 8 Cherries, 3-4 ft.
 - 2 Yoshino, sgl., blue pink
 - 2 Beni Higan, sgl. pink
 - 1 Naden, dbl. pink
 - 1 Kanzan, dbl. deep pink
 - 2 Weeping Cherries, sgl. pink
- \$23.00 Value for \$16.00**

"Pink" Collection \$7.50

- 3 Cherries and 1 Peach, 3-4 ft.
 - 1 Naden, dbl. pink
 - 1 Rosea, dbl. pink
 - 1 Shiro Higan, sgl. pink
 - 1 Flowering Peach, dbl. pink
- \$10.00 Value for \$7.50**

"Gem" Collection \$7.50

- 4 Crabs and 2 Peach, 3-4 ft.
 - 1 Atrosanguinea, sgl. red
 - 1 Floribunda, sgl. pink
 - 1 Hopa, sgl. rose
 - 1 Eleyi, sgl. red
 - 1 Flowering Peach, dbl. red
 - 1 Flowering Peach, dbl. white
- \$10.00 Value for \$7.50**

"Arctic" Collection \$25.00

- 14 Crabs, all different
 - all labelled, 5-6 ft.
 - all hardy in the Dakotas and mountain States
- \$33.00 Value for \$25.00**

"Happiness" Collection \$15.00

- 10 Crabs, 3-4 ft.
 - 2 Eleyi, sgl. red flowers, red fruit
 - 2 Atrosanguinea, sgl. carmine
 - 2 Floribunda, sgl. pink fl., yellow fruit
 - 2 Spectabilis, white dbl. flowers
 - 2 Scheideckeri, dbl. pink fl.
- \$20.00 Value for \$15.00**

"Magnolia" Collection \$12.00

- 1 Alexandrina, deep pink, 3-3½'
 - 1 Nigra, dark purple, 3-4'
 - 1 Soulangeana, pink, 4-5'
- Special at \$12.00**

"Flowering Peach" Collection ... \$6.00

- 1 Early Red, 4-5'
 - 1 Clara Meyer, 3-4'
 - 1 Double White, 4-5'
 - 1 Double Red, 4-5'
- Special at \$6.00**

"Flowering Tree" Collection

- 5 Flowering Tree, 4-5' \$12.50
 - 1 Fl. Cherry
 - 1 Crab
 - 1 Fl. Peach
 - 1 Fl. Plum
 - 1 Pink Dogwood
- Special at \$12.50**

"Flowering Shrub" Collection

- 5 Choice varieties, our selection, 3-4 ft. \$7.50

"Children's" Collection

- 10 Cherries and Crabs for \$5.00
- 1 yr. old

Fruit Tree Department

ESPALIER TRAINED DWARF FRUIT TREES

Distinctive — Practical — Decorative

Trained Fruit Trees should have a place in every garden, and we are sure many gardeners will welcome our offer of these trees at this time. It is a simple matter to erect a "post and wire" fence to which they may be lightly tied or to a "wired wall," which is accomplished by driving wall hooks into the wall at intervals of 1 foot each way, leaving 4-5 inches protruding, to which the galvanized wires are horizontally attached. The "leaders" of the trees are carefully tied to the wires by "figure of eight" loops of tarred twine or heavy raffia, which allows limited leeway and prevents chaffing. Trained trees should be planted 12 to 15 inches from a wall to allow for fruit development.

Beware of cheap espalier trees, for if they are offered at materially less than our prices they cannot be dwarfs but are ordinary orchard trees trained, and they cannot be kept down to the confined space no matter what you do.

Trained trees enable the owners of small properties to utilize wall space which might otherwise be wasted. The side of a building fence may thus be made to produce surprisingly large crops of choice apples, pears, peaches, cherries and even nectarines. Only three years are required ordinarily for these trees to reach the bearing age, and, apart from their practical value, they lend a touch of the "old world" to the garden which is seen all too rarely in this country.

The varieties of fruits listed below have been chosen for their adaptability to espalier work and the high quality of fruit. Under each espalier form we list the fruits available in that particular form.

Apples—Duchess of Oldenburg, Delicious, Fameuse, McIntosh, Baldwin, R. I. Greening, Cortland, Wealthy.

Pears—Bartlett, Flemish Beauty, Clapp's Favorite, Duchess d'Angouleme, Beurre d'Anjou, Seckel.

Plums—Reine Claude, Abundance.

Peaches—Crawford, Rochester, Elberta, Hiley, Yellow St. John, Champion.

Nectarines—Napier, Boston, Red Roman, Newton, Victoria.

Apricots—Early Golden, Moore Head.

Key	Type	Each Price
II	U Form, 4-6 ft., all varieties excepting Pears	\$7.00
	Double U Form, 6 ft. high x 5 ft. wide.	13.50
	Available in Peaches and Nectarines.	
IX	3-fold U Form, Apples and Pear only. 4 to 5 ft.	16.00
	6 to 8 ft.	20.00
IV	4-branch Palmette Verrier. 5 to 6 ft.	11.00
	6 to 8 ft.	14.00
	Available in Apples, Pears and Plums.	
VI	6-branch Palmette Verrier. 4 to 5 ft.	17.00
	5 to 7 ft.	20.00
	Available in Apples and Pears.

Plum	5 to 6 ft.....	1.50	12.00	80.00

HANSEN BUSH CHERRIES

Hansen Bush Cherries. The new quick-bearing Cherry—easy to grow—sure to produce. This is a new development in fruit culture that is gradually changing the method of plum and cherry fruit production throughout the northwest, because of the immense amount of choice quality fruit that can be produced on such a very small area.

The fruit is of large size, good flavor and quality to eat fresh and make the most wonderful rich-flavored, dark purple-red jam. The juice makes splendid jelly as well as a not to be forgotten cordial that won't be kept long.

The fruit of this new cherry much resembles a plum in size and shape. It comes massed in clusters and at times almost completely covers the limbs. The tree itself grows in a bush-like shape, rarely over four or five feet tall, branching and bearing from the ground up, usually bearing the year after planting, though often the year they are set out and annually thereafter. This dwarf stature is of value in the garden as it does not take up the room of an ordinary plum tree yet often bears more. They should be planted two to four feet apart in rows four to six feet apart; twelve to twenty-five or more in every home garden.

In landscape planting the Bush Cherry also is desirable as it is of striking ornamental value, its dwarf bushy nature is of great aid in foundation planting, or they may be planted close enough for a low fruiting hedge on the lawn or in the garden.

The foliage is a beautiful silvery green, turns to a rich red and gold in Fall and adds a very desirable touch to any landscape. The profuse masses of large fragrant white flowers completely cover the branches and are a glorious sight in early Spring.

New reduced priced on **Hansen Bush Cherries**, all heavy, well-branched, strong rooted, bushy trees:

	Each	Per 3	Per 6	Per 12	Per 25
Large two-year	\$.60	\$1.50	\$2.75	\$4.50	\$8.00
